

Student: Adam Gutonski

Project: GUI Project

Term, course, campus: Fall 2018, Python II - CIT 129, North Campus

Project Link: https://github.com/adamgutons/Python2_Sharing/tree/master/final_project

Description: I took some of the scripts that I wrote for this semester and re-created them in GUI format using the Tkinter module.

Starting Out with Python 4th Edition – Tony Gaddis

Future Ideas:

As of now, there is a button in the main menu of the GUI application that does not work. Originally I wanted the user to be able to access their created files via the button, but time ran out! See if you can link up this functionality or do something else cool with the “View Program Files” button.
